

EG CARBURETOR

The switch is designed for vehicles with carburetor or electronic fuel systems that run on gas fuel (LPG or CNG). It is equipped with a full gas level indicator and the ability to automatically switch between fuel types.

SIZE: 76 x 23 x 34mm

TECHNICAL DATA

- Supply voltage: 9 – 16 V.
- Rated current: 150 mA (maximum 3A with solenoids open).
- Output current in gas mode (blue wire): 3A at 60 °C.
- Output current in gasoline mode (yellow wire): 3A at 60 °C.
- Minimum RPM signal amplitude: 0.5 V.
- Housing dimensions – depth/width/height: 67 mm/35 mm/24 mm.
- Manufactured in accordance with UN type approval requirements: R110.00, R67.01, R10.03.
