

EG SUPERIOR 48.4

EG SUPERIOR is the most technologically advanced line of EG controllers. It is the effect of longstanding observations, experiences and studies made by EuropeGAS Research&Development Department

Technical specification

- Number of possible LAMBDA connectable: 2
- Automatic software updates
- Reminding of installation service inspection
- Bluetooth and WiFi connection supported
- Active Diagram Mode – interactive calibration mode
- Automated tuning by pressing the switch button without need of establishing connection with the PC
- Automatic adaptation of multiplier
- Calibration assistant
- Sound signaling when system errors occur
- Continuous maps collection
- No need for connecting the RPM wires
- Optimized extra petrol injection
- Ability to block ECU configuration after a certain period of use
- Disengagement control of the fuel pump as a function of time
- Engine load test (road dyno, measuring power and torque)
- Programmable change of the injectors order
- Oscilloscope of petrol and gas injection signals
- Start&Stop system supported
- Valvetronik system supported
- Automated OBD errors erasing
- OBD errors erasing by pressing switch button (on request)
- Automated OBD errors erasing
- Fast changeover to LPG/CNG
- Customizable function of holding the button
- Automated forced start on gas
- Pre-heating of LPG/CNG injectors
- Built-in Timing Advance Processor
- External dimensions: 124 x 150 x 38 mm
- Connector: 48 PIN
- Housing: Aluminum
