

EG 2000

EG2000 are high quality piston-type injectors. Their uniqueness is proved by the fact that they are versatile. They can be mounted as a single assembly injectors or inline on Europe-gas fuel rail (3cyl. and 4cyl. version available) without any additional adapters.

Technical specification

- Static flow rate, nozzle diameter 3 mm (at 1,2 bar): 100 l/min
- Max. working pressure: 4,5 bar
- Operating voltage range: 12V
- Working temperature: $-40 \div 120$ °C
- Connector: AMP Superseal 282080-1
- Opening time: $< 2,1$ ms
- Closing time: $< 1,3$ ms
- Coil resistance: $1.9 \pm 5\%$ Ω
- Outlet gas fitting: Calibrated nozzle $\varnothing 6$

Effective flow rate: 12 – 45 HP

Version: for single assembly and on 3 cyl. or 4 cyl. fuel rail

3 calibrated nozzle sizes 1,9 mm; 2,1 mm; 2,4 mm
